Rock Stars!

By Alexandria Abramian-Mott

Looking to go hardcore? The latest in rock and stone décor carves a new kind of home cool, with subterranean shapes and patterns emerge to the surface for a fresh take on modern organic. Weitzner's new Quarry wall covering is made from a super-thin, paper-backed stone with mineral traces that create one-of-a-kind patterning. Brenda Houston gives sparkle to hard-rock style with her black quartz Angelina lamps. And if you want color-splashed stone, Philip Nimmo's Pietra Santa sconces suspend shimmering prisms of blue agate in hand-forged iron. ■
