Materials World

By Alexandria Abramian-Mott

Unsuspected materials are making appearances throughout the home this season, giving everyday objects a healthy jolt of surprise. Do a double take on pieces like Carron Baleri's elegant wingback chair, realized in marble. The truly handsome circle black makes a comeback by way of an industrial-chic table lamp, designed by Lesley Azzou. And even brass chain links into the trend with Made Goods' Rocco box, which transforms the hard-edged material into a curving-edge design statement of high-low elegance. ■
